Corrections Institute

Targeted RECLAIM Quarterly Meeting
May 8, 2014

Principles of Effective Intervention

Principles of Effective Intervention

TR: Areas for Growth

Expand focus of key criminogenic needs to include:

- Substance Abuse
- Family and Family Engagement
- Antisocial peers and gangs

TR: Our Greatest Strengths

- Facilitators are prepared
- Content is being covered
- Facilitators are committed to delivering effective interventions, and open to implementing feedback.
- Modeling is accurate, engaging, and concise.
- Pro-social role modeling is taking place
- Reinforcement has improved

Areas for Growth & Program Drift

RISK

WHO

Deliver more intense intervention to higher risk offenders

NEED

WHAT

Target criminogenic needs to reduce risk for recidivism

RESPONSIVITY

HOW

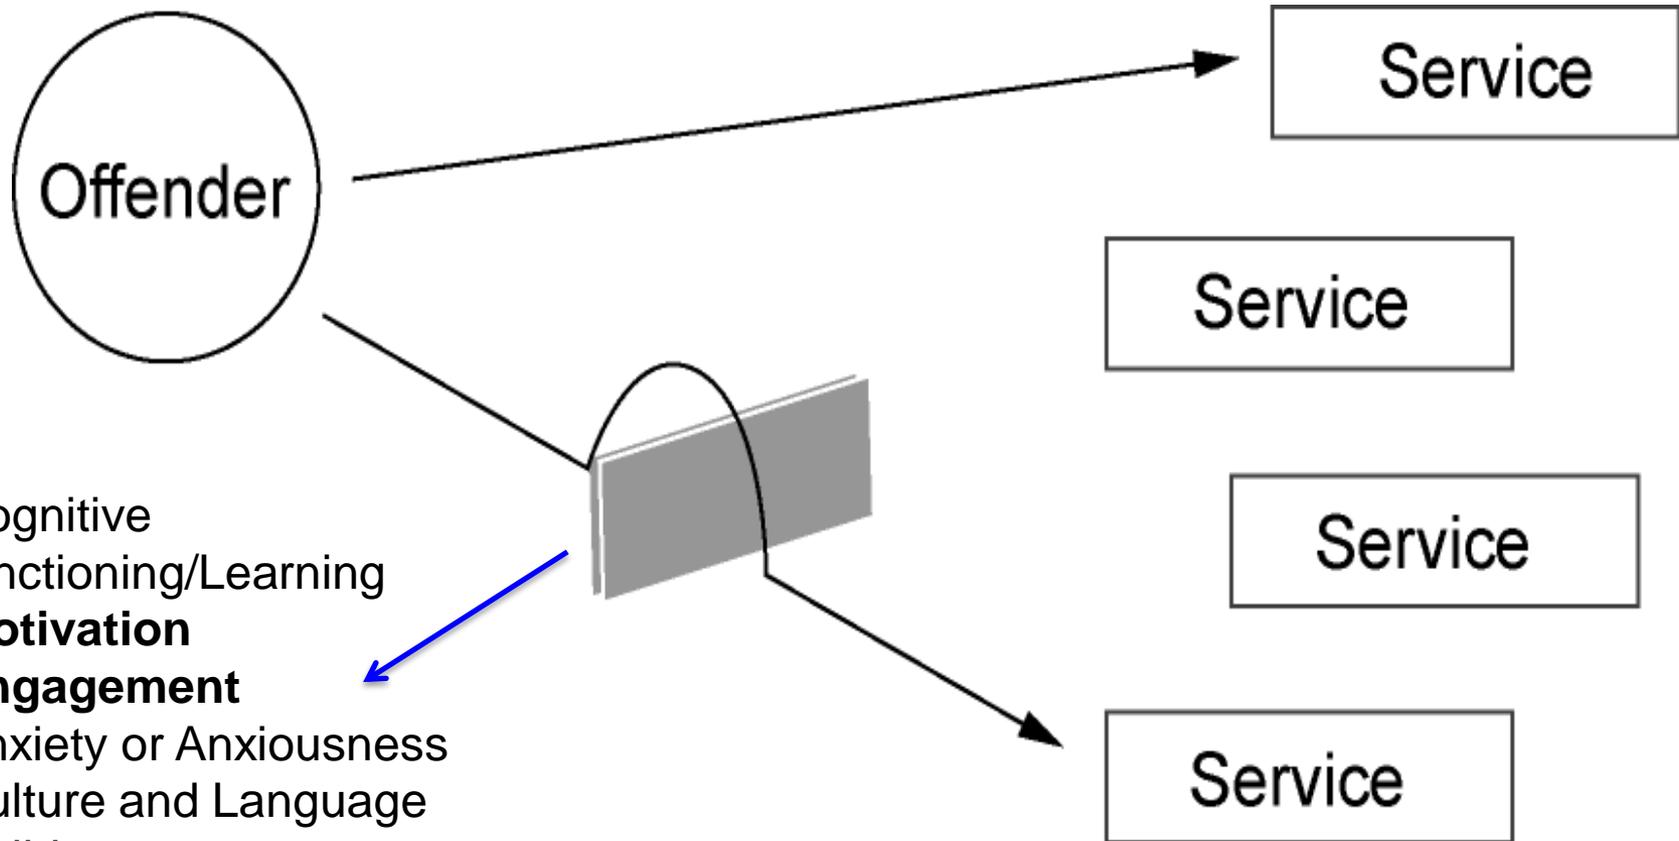

Use CBT approaches
Match mode/style of service to offender

FIDELITY

HOW WELL

Deliver treatment services as designed

Specific Responsivity

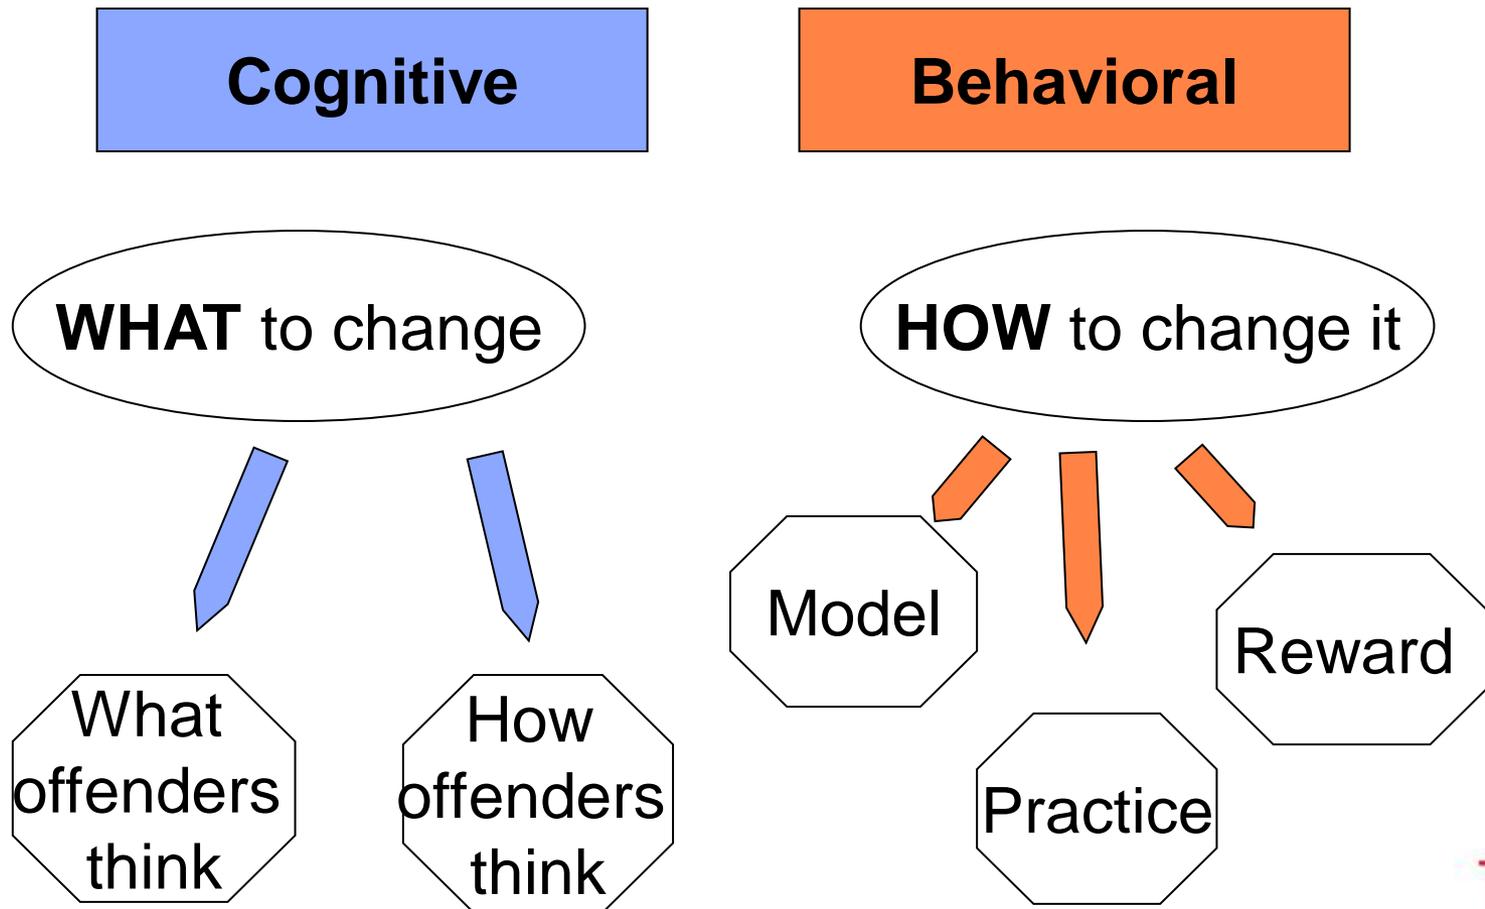

- Cognitive functioning/Learning
- **Motivation**
- **Engagement**
- Anxiety or Anxiousness
- Culture and Language
- Childcare
- Transportation
- Trauma

TR: Areas for Growth

- Targeting barriers: motivation
 - Use of reflective listening
 - Use of open-ended questions (outside of what the manual tells you to ask)
- Engagement: making it “real” to them
- Core Correctional Practices
 - Quality Interpersonal Relationship Skills
 - Effective Reinforcement

Cognitive-Behavioral Interventions

TR: Areas for Growth

- Use of open-ended questions to introduce the skill/technique to create 'buy in'.
- Use of role-play and practice in group sessions.
- Feedback protocol and frequency of social/verbal reinforcement.
- Effective use of disapproval.

Next steps and Ideas?

QA: Related Challenges

- Incomplete information / completion of the assessments
- Incomplete identifying information including names, dates, and pre and post test.
- Low N of pre and post test assessments.
- Prior use (early FY13) of outdated assessment instruments.
